

Thank you for visiting us! We truly hope you had a wonderful experience.
If so, we'd greatly appreciate it if you'd leave us a 5-Star Google Review.

To leave a review, **simply scan the QR code to the right** with your camera and click on the link that pops up. You can enter your Google Review right there. It takes 2 seconds and makes a world of difference for our business. (Thank you in advance!)

If your time with us was anything less than a 5-Star experience, please let us know at 513-454-6911. We'd love the opportunity to make it right!

Eyeliner Aftercare

It usually takes around 5-7 days for the skin to heal. However, you should follow the After-Care until your skin is completely healed. Your skin is healed when all flaking and/or scabbing is gone.

Day of Treatment:

- Do not touch your eyes.
- Before bed you can ice your eyes by placing it on top of a fresh paper towel or tissue. Do not put ice directly on skin.
- Do not wash eyes and try to keep them dry.
- If your eyes are swollen, you may take Tylenol.

Days 2-7 (until the scabbing stops): WASH

- **Gently** rinse your eyes each morning and night with water and a gentle soap (ex. Dial, baby shampoo, Cetaphil). **DO NOT** use any cleansing products containing acids (glycolic, lactic, or AHA), or any exfoliants.
- **Do NOT apply any aftercare ointment, salves, or lotions.** (This includes eye creams, Aquaphor, Vaseline, Neosporin, etc.)
- **Do not rub or pick at your eyes. This can cause scarring, blurring, and/or infection. Should there be any scabbing, let them fall off naturally.**
- Do not soak your eyes in water until healed (ex. bath tub, sauna, pool, or hot tub). Showers are fine but limit them to five minutes to prevent too much steam around the eye area.
- Avoid facials, chemical treatments, and Botox until your eyes are healed.
- Do not allow makeup, lotions, or other products to touch the treated area. **No eye makeup for at least 7 days minimum or until fully healed!**
- Stay out of direct sunlight and tanning booths. You can go outside of course! Avoid laying out at the pool or a beach until your eyeliner is healed. If you are going to the beach or pool wear a hat that shields your eyes from the sun until you're healed, like a visor or baseball cap.

- Consult a physician if you have ANY signs of infection, which could include redness in the eye area (aside from the first 48-72 hours after your appointment), foul smell, green or yellow discharge, and/or fever.
- Should you have any questions or concerns, please call or text us at (513) 454-6911.

Long-Term Aftercare (After Your Skin is Healed)

- **You can resume wearing eye makeup after day 7.** New mascara is recommended to prevent old bacteria being introduced to procedure area.
- You can **resume using lash serum or getting new eyelash extensions 4 weeks after your touchup appointment. (Do not use in between appointments.)**
- Inform your technician of your permanent eyeliner at the time of any laser procedures or MRIs.

Healing Stages

- **Day 1:** Your eyeliner looks great! Redness and puffiness will dissipate within a couple of hours. Minor soreness may remain, but typically ice and Tylenol will help.
- **Days 2-4:** Your eyes may still be slightly swollen but this is normal and some clients have slightly more swelling than others. This is temporary and will only last a few days on average.
- **Days 5-7:** Your eyeliner may begin to flake or scab and fall off. This step is normal and necessary. Whatever you do, do not pick at your eyes. Let them naturally flake off.
- **Days 7-10:** Your eyeliner may appear several shades lighter once the scabbing is gone. It's common to worry that something is wrong. If you're following the aftercare fully, this is very normal. The top layer of skin is fresh and is muting the pigment. You can begin wearing eye makeup again—new mascara is recommended!
- **Days 11-28:** Your eyeliner will begin to appear darker and you may feel relieved to see some of the color returning. It's common to be slightly patchy in spots, and to feel that your eyeliner isn't dark enough. Not to worry, that's why we have touch up appointments!
